S. Find the real read of the egn. 0 - ()

$$f(1) = 1 - 1 - 1 = -1$$

$$f(2) = 8 - 22 - 1 = 5$$

$$n_1 = \frac{1+2}{2} = 1.6$$

Then for = 1.83-1.5-1 = 1/8 > 000.

$$\eta_{s} = \frac{1+1.5}{2} = 1.05$$

$$(100) = 1.25^{3} - 1.25 - 1 = -\frac{10}{64} \times 0$$

$$\eta_{s} = \frac{1.25 + 1.5}{2} = 1.346$$

$$(100) = -0.06 \times 0$$

$$\chi_{h} = \frac{1.2125 + 1.346}{2} = 1.3484$$

$$\chi_{h} = \frac{1.3125 + 1.3281}{2} = 1.3221$$

$$\chi_{h} = \frac{1.3225 + 1.3281}{2} = 1.3202$$

$$\chi_{h} = \frac{1.3225 + 1.3281}{2} = 1.3202$$

$$\chi_{h} = \frac{1.3203 + 1.3281}{2} = 1.3242$$

$$\chi_{h} = \frac{1.3203 + 1.3281}{2} = 1.3242$$

$$\chi_{h} = \frac{1.3242}{2} = 1.3242$$

$$\chi_{h} = \frac{1.3242}{2} = 1.3242$$

$$\chi_{h} = \frac{1.326}{2} = 1.3226$$

$$\chi_{h} = \frac{1.3226}{2} = 1.322$$
